MEMORANDUM FOR MR. COLBY

SUBJECT: *Dr. Hall's Response to Senator McClellan*

25X1
1. Al Hall's response to Senator McClellan provides, in two parts, an identification of "tactical" intelligence at about [] personnel. He has split his reply into two letters and otherwise tried hard to avoid Congress concluding that these programs should be added to the "intelligence" total or reviewed concurrently.

25X1
2. We will work with ASD(I) to understand this breakdown in more detail. It does not include some programs we have included when describing a [] total. However, since these numbers are being provided to Congress, we will need to work with them for awhile. There may not be as much flexibility in these programs as you would hope.

3. A suggested reply to Hall is attached.

(Signed) Lew Allen
